

Greg Pelton
Chief Development Officer
Cisco IRIS

Greg Pelton is Chief Development Officer of Cisco IRIS, an initiative that will deliver Internet routing on space satellite platforms to provide a new model for delivering global IP networking capabilities. He is responsible for creating a suite of space-ready products and developing the business plans and go-to-market strategies necessary to fulfill IRIS.

Previously, Pelton served as Senior Director of the Cisco Technology Center, where he lead Cisco into new businesses including IP telephony, wireless, home networking, cable, IPTV, mobile networking, and TelePresence. In support of these initiatives and to create new markets for Cisco innovation, Pelton was responsible for developing strategic partnerships with industry leaders, creating ecosystems with emerging companies, funding university research programs and driving the development of standards.

Before joining Cisco in 1998 Pelton held an executive position at Nortel Networks, developing telecommunication products for service providers. He also established and operated a joint venture with Daimler Benz.
